This is an R Markdown presentation. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see <http://rmarkdown.rstudio.com>.

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document.

# Two Column Layout

Title or In-  
Tail

Author's name

First Part

Second part

This slide has two columns.

In Beamer, each column in between `\begincol` and `\endcol`.

In HTML, the `{.columns-2}` option is added to the slide title and `<p class="forceBreak"></p>` allows forcing column break.

```
plot(pressure)
```

See R Markdown: The Definitive Guide for full documentation about HTML slides.

Note:

- `{.flexbox .vcenter}` to center the HTML slide with plot.
- `out.width='90%'` to reduce the size of the plot in the Two Column Layout slide.
